

## DETACHABLE POROUS VAGINAL MOLD

### ABSTRACT OF THE INVENTION

A detachable vaginal mold is provided. The detachable vaginal mold includes a main body, a minor part, and a jointing design formed between the main body and the minor part for connecting the main body to the minor part. The jointing design is one selected from a group consisting of a dentation design, a mortise design, a screw design, a mitre design, a fastener design, and a combination thereof.
